SNAPTRAN TEST SERIES PROPOSAL III, REVISION III

HSHP:WPG

This is to confirm the verbal recommendations given to Mr. Don Six by W. P. Gammill on September 21, 1964, concerning the subject TSP.

After considering the potential hazards associated with this test series, it is the recommendation of the Health and Safety Division that all tests classified in the "Moderate" category be performed with the IET Test Cell doors closed. Such transient tests will require meteorological restriction in the event it becomes necessary or desirable to test with the doors open.
